Faculty Support Sub Committee Report

During 2012 the subcommittee facilitated funding for the Math, English and Language Faculties. English had a data projector installed in C5. LOTE similarly purchased a Smart Board and accessories. Math purchased Graphics calculators to be used by students studying General Math in the HSC.

A trial was run assisting one faculty in administrative work on a specified day at the end of term 4. This appears to have been successful. The aim is for this initiative to be expanded to include more faculties and to happen more often during 2012.

Thanks to Kelly Burke and Mark Rolfe for their assistance on this Subcommittee.
