Faculty Sub Committee report Nov 9th 2010

The following messages have been received from the respective faculty heads.

TAS:
Have purchased 10 X 24L 1000W Panasonic microwaves through "Appliances on line". These were discounted to $156 from $199. (Total Cost $1560). They are absolutely delighted to be replacing 20year plus microwaves. The Industrial Arts power tool order is still in progress and will be finalised ASAP.

Staff have asked for thanks to be extended to the P&C, these purchases will make a huge difference in our classrooms.

HSIE
Are going to organise their classes so that some teachers can paint two rooms on 13, 14 and 15 December. HSIE faculty funds will pay for the paint but if there are any parents willing, able and available to come help out during those days (I know most will be at work) that would be great. If not that's fine too - it's a very busy time of year for everyone. Thanks

PDHPE
The Smartboard is expected to be installed in G2 this term, along with a PE faculty inservice on its use. Thanks so much once again for the opportunity to update the technology in the PE faculty.

A request for help for the painting bee for HSIE has been posted to the google group.

The offer from the head teachers of HSIE and Science to Speak to the P&C meeting about how they are utilising the new technology has been deferred until next year.
